Subject: Agriculture and Industry Committee - Growth of free range in Australia 2005 to 2015

Date: Thursday, 14 April 2016 5:57:30 PM

At the hearing Mr Zappia, MP, asked me about the change in the composition of the egg industry between 2005 and 2015 and I did not have the answers handy. They appear below. Would you please forward this email to him.

The estimated grocery market share by volume in -

2005 <https://www.aecl.org/assets/Uploads/Annual-Reports/Annual-report-2005.pdf>

Cage: 75.2%

Barn: 6.1%

Free Range: 14.5%

2015 <https://www.aecl.org/assets/About-us/Annual-Report-2015.pdf>

Cage: 51%

Barn: 8%

Free Range: 39%

If you need any other years all that data is available in the annual reports which are on the AECL website <https://www.aecl.org/about-us/annual-reports/>

Kind regards
